Dear Author,

We are pleased to inform you that your paper (Paper id: 132) has been accepted for presentation at the International Conference on Advanced Research in Engineering.

The reviewers have found the content of your paper valuable and relevant to the conference; however, certain revisions are required. Please find the reviewers' comments attached for your reference.

We kindly request that you submit the revised version of your paper by 15/11/2024. The revised submission will be formally accepted for presentation at the conference.

To ensure a smooth process, please:

1. Address each of the reviewers' comments in your revision.
2. Highlight the changes made in the revised paper or provide a point-by-point response to the reviewers' feedback.
3. Submit the revised paper by uploading it to the conference submission portal.
4. The paper should strictly be formatted in AIP format. Please refer conference website icare.cgic.ac.in for details.
5. Please ensure that the revised manuscript has Plagiarism level less than 10%. This includes any text, figures, and other materials that must be properly cited and referenced. Further, AI-generated content is also less than 10% of the total paper content to maintain the authenticity and integrity of the work.
6. Kindly fill the google form (<https://forms.gle/h55UY3T79Gf6oipF7>) after registering for the conference.

The reviewer comments are given below:

The manuscript is well-written and explores an interesting area of study. However, several major revisions are necessary to enhance the overall quality and rigor of the paper. Specific areas for improvement are as follows:

1. Acronym Definitions: Several acronyms are used throughout the manuscript without definitions. Please ensure that all acronyms are fully defined upon first use.
 2. Consistent Acronym Use: Using capitalized initials, each acronym should be introduced only once. Also, avoid the capitals in between the text.
 3. Image Quality: The quality of images is low, which reduces readability. Please provide high-resolution images to ensure clarity.
 4. Avoid First-Person Language: Avoid using personal pronouns such as "I" and "we" to maintain an academic tone.
 5. Missing Architecture Section: Although an architectural section is mentioned, no basic architecture diagram is included. Adding this diagram would greatly enhance the reader's understanding.
 6. References: Citations are missing within the manuscript, and there is a need for additional and more recent references. Consider incorporating sources from 2023 or later to strengthen the relevance of the literature review.
 7. Figure Citations: Figures lack in-text citations, which are essential for guiding readers through the visuals.
 8. Table Captions and Citations: The tables lack captions and in-text citations. Each table should be properly captioned and cited in the text.
 9. Results Section: While the results section mentions tables and graphs, no graphs are provided. Including relevant graphs would enhance the presentation and clarity of the findings.
- A thorough review of the manuscript's structure and alignment with conference requirements is recommended. Addressing these comments will substantially improve the paper's clarity, readability, and adherence to academic standards.

We look forward to receiving your revised submission and appreciate your cooperation in this process. Should you have any questions or require further clarification, feel free to contact us at icare2024@cgic.ac.in.
